### DETAILED ACTION

1. Acknowledgment is made in the receipt of the preliminary amendment and oath filed February 6, 2004.

#### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by US 4,974,707 to Neumann et al.

Re-claim 1, Neumann et al. discloses in figure 3 a hydraulic dashpot with a cylinder 102 and primary piston 104 divides the cylinder into two compartments (or working chambers 109 and 111), the piston is mounted at a lower end of a piston rod 107, the piston is provided with breaches (or passages 112 and 118), and shock absorbing valves 116 and 121 that vary the cross section of the breaches, a bypass system (passages 153 and 154) comprises two mutually dependently controlled bypasses between the two compartments, characterized in that the bypass system can be closed and opened to various extents by controlling a sliding valve element 123a, the slide is provided with a flow control breach (124a and 152a), the slide travels back and forth across the two bypasses, which extend adjacent through it, a separate breach is provided for each bypass.

Re-claim 2, the two bypasses are opened and closed sequentially.

Art Unit: 3683

Re-claim 3, the two bypasses are opened and closed mutually discontinuously.

Re-claim 4, the two bypasses have different cross sections.

***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Lieber et al., Huang ('965 and '663), Feist et al. (DE 102 06 104) and Herberg (DE 40 20 045) each teach a shock absorber with a bypass through the piston, the bypass controlled by a slide.

5. Any inquiries concerning this communication or earlier communications from the examiner should be directed to Thomas Williams whose telephone number is (703) 305-1346. The examiner can normally be reached on Monday-Thursday from 6:30 AM to 4:00 PM. The examiner can also be reached on alternate Fridays.
